

## CONCEPTUAL CAKE

by Microcollection

### Thirty by twenty five

Yellow, Varese, Italy 18 January 2015

$30 \times 25 = 750$  obviously.

There must be a trick, it is too easy, I don't know how to explain myself

Gosh, Maths, here again at my age, I can't bear it.

Painful feelings, sad school memories

once more in front of me.

*Fear, tests, trepidations,  
emotions, loss of memory, palpitations.*

*Whispers, anxiety, fast,  
amnesia, panic, bad mark.*

A voice from above is suggesting something else,

how can I have misunderstood, silly of me!

Of course  $30 \times 25$  is the measure of this conceptual cake, thank you!

Michael Lawton asked me to make a  $30 \times 25$  cm cake, so here I am with my custom-cut praised sugar free CONCEPTUAL CAKE, without the most common allergenic ingredients, gluten, dairy, eggs, but full of intentions.
